

icoone®

Beauty Effect

Micro Actions, Macro Changes

A close-up photograph of a white, illuminated circular logo. The logo is set within a larger white structure that has a curved, metallic-looking edge on the left. The word "icoone" is embossed in the center of the circle in a lowercase, sans-serif font. The entire logo is surrounded by a bright, glowing white ring, which is part of the larger structure. The background is a light, neutral color.

icoone

Robosolo

Thanks to its ergonomics and ease of use, this handpiece allows targeted treatments in specific fat areas on large parts of the body.

15.600
Microstimulations
every minute

Robotwins

icoone® is the only device able to achieve treatments with two handpieces at the same time, generating a symmetric stimulation, twice as fast and effective as a single operated handpiece.

21.600
Microstimulations

up to **13.200**
Microstimulations
every minute

6
HANDPIECES

The **NEW icoone®** is the only device in the world that, thanks to the **innovative patent Roboderm®**, allows to treat different kind of skin blemishes through the **Multi Micro Alveolar Stimulation (M.M.A.S.)**, a deep and effective stimulation of the microvacuoles in the connective tissue, that guarantees visible results from the first session. icoone® allows to exert a **two handed symmetrical treatment**, working simultaneously on both sides of the body: relaxing and delicate as a manual massage but with the technology effectiveness.

+ 25%

OF THE ACTIVE STIMULATION SURFACE

Due to the increased size of the micro holes located in the microstimulators surface of the Twins and Micro handpieces, the cellular stimulation is nowadays even more effective and allows to achieve a high-performant treatment with faster time.

ROBODERM®

THE TECHNOLOGY THAT ACHIEVES RESULTS.

Roboderm® technology allows to triple the stimulation surface (2 independent motorized microstimulators and one central chamber) granting a better movement of the handpieces so that the operator does not need to exert pressure. In this way, both hands can be used simultaneously to produce a more delicate and natural stimulation for the client, without fatiguing the operator: **cutting-edge technology with utmost simplicity of operation.**
