

icoone®

BODY VERSION

Beauty Effect

Micro Actions, **Macro** Changes

A close-up photograph of a white plastic object, likely a piece of equipment or a container. The object has a smooth, slightly curved surface. In the center, there is a circular recessed area containing the word "icoone" in a lowercase, sans-serif font. The letters are raised slightly from the surface. To the left of the circular area, there is a small, partially visible white plastic component with a circular opening. Below the circular area, there is a series of small, oval-shaped holes arranged in a row. The lighting is soft and even, highlighting the texture of the plastic.

icoone

5 HANDPIECES *in total*

Robosolo

Thanks to its ergonomics and ease of use, this handpiece allows targeted treatments in specific fat areas on large parts of the body.

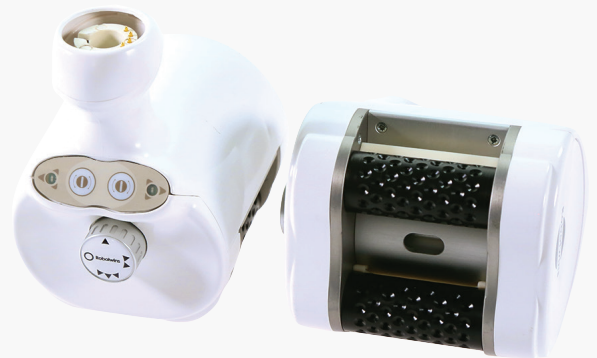

15.600
Microstimulations
every minute

Robotwins

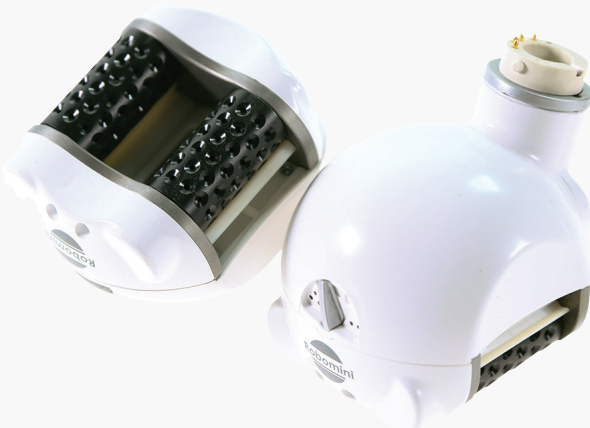

icoone® is the only device able to achieve treatments with two handpieces at the same time, generating a symmetric stimulation, twice as fast and effective as a single operated handpiece.

21.600
Microstimulations
every minute

Robomini twins

These handpieces, now also available in twin version, are specifically designed to treat efficiently small or hard to reach areas of the body.

14.400
Microstimulations
every minute

The **NEW icoone®** is the only device in the world that, thanks to the **innovative patent Roboderm®**, allows to treat different kind of skin blemishes through the **Multi Micro Alveolar Stimulation (M.M.A.S.)**, a deep and effective stimulation of the microvacuoles in the connective tissue, that guarantees visible results from the first session.

icoone® allows to exert a **two handed symmetrical treatment**, working simultaneously on both sides of the body: relaxing and delicate as a manual massage but with the technology effectiveness.

+ 25%

OF THE ACTIVE STIMULATION SURFACE

Due to the increased size of the micro holes located in the microstimulators surface of the Twins and Micro handpieces, the cellular stimulation is nowadays even more effective and allows to achieve a high-performant treatment with faster time.

ROBODERM®

THE TECHNOLOGY THAT ACHIEVES RESULTS.

Roboderm® technology allows to triple the stimulation surface (2 independent motorized microstimulators and one central chamber) granting a better movement of the handpieces so that the operator does not need to exert pressure. In this way, both hands can be used simultaneously to produce a more delicate and natural stimulation for the client, without fatiguing the operator: **cutting-edge technology with utmost simplicity of operation.**

21.600
Microstimulations
every minute
